  - 2012 New Brand Promise: People. Passion. Performance.

Founded over 110 years ago, Chicago Pneumatic has a strong history of constantly looking for new ways to meet your needs, today and tomorrow.

Way back in 1889 John W. Duntley realized that construction workers in particular had a need for many tools that weren't yet available. He founded Chicago Pneumatic Tool Company and set out on a lifelong mission to provide all types of industries and companies the tools necessary for their success.

Over the years Duntley grew the company through product innovation, always insisting on product quality and reliability. The name Chicago Pneumatic became known and appreciated by workers around the world for durable, reliable tools that made tough jobs easier and were designed to meet specific needs.

Today, Chicago Pneumatic is a global brand that offers products for almost every industry and countless applications. We're proud to say Chicago Pneumatic still stands for reliability, durability and customer value.

# **Building on success**

From production to maintenance or repair work, your experience of our tools, compressors, and construction equipment is key to our product development and continued success. It is our mission to keep you productive at all times.

**CP** Classic Impact Wrench

# **Our Mission**

# Our focus on your industry

Chicago Pneumatic Tools offers hundreds of quality air tools designed for a wide range of maintenance and production applications: impact wrenches, ratchet wrenches, screwdrivers, drills, grinders, sanders and polishers, cutting tools, and a whole lot more.

Based on decades of expertise in providing the right tools, compressors or construction equipment for the toughest demands, we understand the needs of the professionals for maintaining, repairing and refurbishing manufacturing equipment.

# A clear and ambitious strategy

Chicago Pneumatic is delivering best-in class global and local support to customers through large product portfolio availability and a strong network of authorized distributors.

# People. Passion. Performance.

- Tools and technology training
- Fast support for sales, maintenance and servicing
- Air solution expertise for superior quality, ergonomics
- and productivity
- Committed to the customers

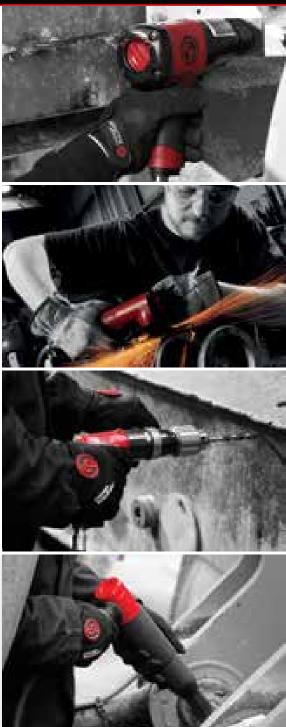

CP Tools' offer:
Large range of tools and accessories
Stock availability
Constant products and services development
Certified quality testing for enhanced performance and durability
Competitive pricing strategy

# Proud of our people and values

Chicago Pneumatic Tools is 100% partnering with distributors to ensure local and fast support to the end-users. Our people and partners are trained about the latest air tools technology in order to be the best tool-adviser for the end-user. We bring added value in always targeting to deliver the best choice for each application.

Chicago Pneumatic Tools is part of a large organization that encompasses several other product lines dedicated to professionals. CP can be also a partner of choice for **your compressor needs** and for **construction/ demolition tools**. All are built to withstand tough conditions.

# Catalog Guide

# The Classic Range

The Classic logo is designated throughout this catalog for tools which have been getting the job done for many years. For decades, these tools feature durability and authentic styling which has made these legendary among mechanics. CP Classic tools to include a two year warranty when registered online.

Limited 2-year warranty extension REQUIRES registration of each tool on the CP website within 4 weeks of the original purchase date. Visit www.cp.com/classic for more info.

# **Accessories & Spares**

AIR LINE ACCESSORIES

ERGONOMICS

CONSUMABLES

Original CP Spares and genuine Tune-up kits are available for your CP tools

Follow these logos to find the dedicated spare-kit and accessories selection listed at the end of each product section.

# Impact Wrenches

An impact wrench delivers a series of rotary blows to a fastener, producing torque. The advantages of impact wrenches are the **high power-to-weight ratio**, fast rundown, and limited torque reaction to the operator.

# **Ratchet Wrenches**

For bolting applications in tight and difficult to access areas, CP offers you a range of ratchet wrenches with various square drive sizes up to 90 ft-lbs (122Nm).

#### How to select your bolting tool? Choose Choose Step 1 Step 2 Step 3 your your retainer **Applications** Sockets Tools Handle A wide selection of retainers pro-Materials ► Type ► Clutch type vides from versatility to safety for Size every type of application - all with ► Joint types ► Handle type power, speed and comfort. - Composite body and Aluminum clutch housing
- 3 power settings in forward & full power in reverse
- Protective cover & reinforced structure
- Progressive trigger & Rubber grip

# BENEFITS

- Light weight, limited vibrations & noise for operator comfort
- Durable and reliable impact for intensive maintenance usage
- Powerful but easy to control for bolting jobs
- Mutli-purpose tool for versatile applications

# MEDIUM-DUTY, ERGONOMIC & COMFORT IN 3/4"

# **FEATURES**

- 3/4" Medium Duty impact wrench
- Pin clutch oil bath
- Aluminum body & steel clutch housing
- Pin-type socket retainer

#### BENEFITS

- Best tool for versatile medium-duty industrial applications
- Operator comfort due to low vibrations
- Perfect control with a multi-position regulator
- Reliable pin clutch in oil bath & durable housing
- Compact 3-part construction & easy to maintain

# See accessories on pages 21 & 24

# CP6060 SASAK

**CP6060 SASAR** 

CP6060 SASAB

Same featurs as CP6060 SASAK with 3/4" anvil with

hole type socket retainer

Same features as

Ring Retainer

CP6060 SASAK with

# SUPER-DUTY, POWERFUL & SMOOTH COMFORT IN 1"

#### **FEATURES**

- 1" super-duty impact wrench
- 2-jaw clutch
- Aluminum body & steel clutch housing
  Hole type socket retainer

#### **BENEFITS**

- Best super-duty 1" to loosen big bolts on very demanding industries
- Operator comfort and control thanks to perfect ergonomic design even at high torque levels
- Reliable 2-jaw clutch & durable housing - Compact 3-part construction & easy to maintain

## SUPER DURABILITY

#### **FEATURES**

- 1" impact wrench
- Rocking dog clutch
- High torque: 1750 ft.lbs (2373 Nm)
- 3-position power settings
- in forward and reverse

# BENEFITS

- Operator comfort
- Value for money

# **CP796**

# **D**URABLE & POWERFUL

## FEATURES

- 1" pistol impact wrench
- 2 jaw clutch
- Very high torque: 2000 ft.lbs (2712 Nm)
- Compact housing design
- Adjustable side handle

## BENEFITS

- Powerful motor and extremely durable clutch
- Operator comfort
- Industrial quality and dependability

# See accessories on pages 21 & 24

# 3/4" - 1" Impact Wrenches

# **CP7782**

HIGH TORQUE

#### FEATURES

- 1" straight impact wrench with short anvil
- 2140 ft.lbs (2900 Nm) of maximum torque in reverse
- Pinless closed reinforced rocking dog impact mechanism
- Socket retainer ring combined with hole retainer
- Ergonomic side handle
- Full teasing trigger
- Regulator with integrated forward/reverse with 3-position power settings in both directions

#### BENEFITS

**CP7780** 

- High efficiency motor, yet economical with durable reinforced clutch mechanism
- Highly durable impact wrench with great power for the
- toughest jobs on heavy vehicles

LIGHTWEIGHT & POWERFUL

#### **FEATURES**

- 1" straight impact wrench with short anvil
- 15 lbs (6,8 kg) thanks to an aluminum housing giving less fatigue to the operator
- 1700 ft.lbs (2320 Nm) maximum torque in reverse
- Integrated protective cover on the clutch housing
- Twin hammer mechanism in oil bath
- Dedicated lever for forward & reverse
- Ergonomic side handle with soft touch grip
- 4-position power setting for both directions and on both sides of the tool
- Down exhaust blows air away from the work place
- Socket retainer ring combined with hole retainer
- Double stage trigger

#### BENEFITS

- Maximize operator comfort with a lightweight and powerful tool
- Ergonomic and intuitive handling
- High durability

**CP0611 PASED** 

# CP0611 GASED

Same feature as CP0611 PASED with external trigger

#### **CP0611P RS**

Same features as CP0611 PASED with pistol type handle

- Hole type socket retainer

- D-type side handle

- Internal trigger

#### BENEFITS

FEATURES

- 2-jaw clutch

- Best performer of industry to loosen

SUPER DUTY, COMPACT

- 1" super-duty impact wrench

& EXTREME POWER IN 1"

- Aluminum body & steel clutch housing

- big bolts quick and easy - Operator comfort and control with adjustable side handle even at high
- torque levels - Reliable impact mechanism & durable
- housing - Compact 3-part construction & easy
- to maintain

Square Drive

Same features as

CP9426 with 3/8"

# HIGH POWER & COMPACT

# **FEATURES**

- 1/4" mini ratchet - One of the smallest ratchets only
- 5.1" (130 mm) long - Rubber grip

#### **BENEFITS**

- Most powerful of its class
- Operator comfort
- Compact and lightweight

# SMALL & HANDY

- 1/4" ratchet

#### **FEATURES CP825T**

## Same features as CP825 with 3/8"

- Small ratchet, only 6.5" (165 mm) long Square Drive - Convenient forward and reverse button
  - **BENEFITS**
  - Ideal for tight access applications

1/4"

- One-finger directional changes
- Compact and lightweight

- Progressive tease throttle

# **CP826T**

Same features as CP826 with 3/8" square drive

# **DURABILITY & COMFORT**

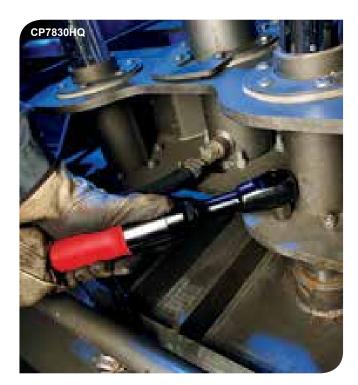

#### FEATURES

#### - 1/4" ratchet

- Faster rundown with 250 rpm
- Exceptional durability with advanced head design that virtually eliminates slippage

#### BENEFITS

- Compact tool and urethane grip for comfort and control
- Excellent for under-dashboard work, small engine repair and small fasteners

#### See accessories on pages 23 & 24

- Easy access in restricted area

anti-slip head design

- Hardened gears

BENEFITS

**FEATURES** 

- 1/2" ratchet

- Greater durability over other economically priced ratchets

**HEAVY-DUTY & DURABLE** 

- Features CP's patented TriSpring

- Easy grip reverse for simple directional changes

- Compact, yet packed with power and speed

- Highest torque on the market: 90 ft.lbs
- (122 Nm)
  - Rubber handle grip
  - Features CP's patented TriSpring

# BENEFITS

- Lightweight and well balanced tool
- Durability and comfort
- Ratchet head protection
- Ideal for larger fasteners

# See accessories below and page 24

# **Clutch Type**

Direct drive

- No clutch, directly driven bit
- Stall torque regulated to air pressure
- Easy to use and maintain
- Ergonomic handling (light weight, size...) Positive clutch
  - Good for varying torque applications
  - Operator can force clutch engagement for higher torque
- Excellent for wood applications
- Cushion clutch
  - High speed rundown
  - Torque output adjusted by the spring tension
  - Clutch ratchets at preset torque
  - Easy to use, to adjust and to maintain
- Rocking dog clutch:

· Good on very soft joints providing high speed rundown.

# Grinding

# Wheel grinders

For large and medium surfaces, wheel grinders are designed for grinding, cutting, countouring at a high material removal rate.

# **Collet grinders**

For applications with limited access, collet type grinders are prefered for deburring, die countouring, light chamfering with precision.

Step 1

**Applications** 

Materials

► Access

DutyVibrations

Straight Die Grinder

# For maximum material removal with minimum effort, choose the best tool.

Step 2

Abrasives

Carbide burrs

Mounted points

Grinding wheels

Cutting wheels

► Flap wheels

# Step 3

- Tools
- ► Die grinders
- Angle grinders
- Vertical grinders
- Extended shaft grinders

Straight extended Die Grinder

Angle 90° Die Grinder

Angle 120° Die Grinder

Caution: CP grinder should comply with the Maximum Operating Speed recommended by component and abrasive manufacturers

# **Select your Grinders**

# **ERGONOMIC FEATURES**

Chicago Pneumatic Abrasive Tools have all the benefits of advanced ergonomics... with the features required to enhance the physical and mental well-being operators need to achieve increased productivity levels:

- . Significant sound and vibration reduction helps reduce operator fatigue and improve performance.
- . Complete line designed for maximum productivity under rugged conditions. . Wide choice of tools - die grinders, small wheel grinders, horizontal grinders,
- and vertical grinders.
- Powerful, yet complete and lightweight produce more power per pound than comparable electric models.

. Air powered - Minimal risk of electrical shock or overheating - even with continuous use.

- Other Features:
- . Rugged construction to withstand tough use.
- Head treated internal parts keep tool operating, minimize repairs.
   Easy to service simple replacement of rotor blades usually restores original power.
- . Wide variety of accessories extended versatility of the tool.

# **COLLET GRINDERS**

#### Recommended speeds depending on the machined and the diameter of the head of the carbide burrs.

The choice of burr depends on the size of your application. A larger volume of material to be removed will require a bigger size of abrasive. Select the tool rpm depending on the diameter of the burr head, the material to be ground and the material in the rotary burr. Use tungsten carbide burrs for hard and tough materials. High speed steel burs are recommended for unhardened and medium hard materials. See table.

	Diamet	er of the head of	the carbide burrs	;	
Material	1/8" (3 mm)	1/4" (6 mm)	3/8" (10 mm)	1/2" (12 mm)	5/8" (16 mm)

# WHEEL GRINDERS

Pure material removal, regardless of whether it is removed from a cramped or an open space. is determined by the power generated at the grinding process. The applied feed force and the rotation of the wheel generates a cutting force which multiplied by the peripheral speed of the wheel represents the power removing material (power = peripheral speed x cutting force).

Chicago Pneumatic grinders features a high degree of safety. Safety throttles, over-speed shut-off and wheel guards are good examples of product safetey features carried by your grinders.

The table below will help you to translate the peripheral speed of the grinding wheel to the correct rotational speed of the grinder when using a specific diameter of grinding wheel.

		Maxim	um work sp	eed in m/s	or Feet/Mir	ı		
Diameter	32	35	40	50	63	80	100	125

Small precision deburring: die grinding is performed with either tungsten carbide, high speed steel burrs or mounted points.

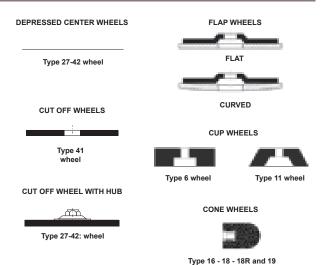

Mounted Points

#### How ensure operator safety:

- . Check the tool free speed
- . Match the maximum speed of the
- abrasive to the grinder
- Inspect the grinding wheel
- . Inspect the flange . Inspect the wheel guard
- hearing protection Test run your grinder in a protected area after assembling the wheel
  - . Make sure that the tools receive proper maintenance, see service sheet

Wear protection goggles, gloves &

See details on page 40

# **HIGH-SPEED PRECISION WORK** FEATURES

# - Compact pencil grinder

- 3 mm and 1/8" collets included
- Very low noise level: only 71 dB(A)
- Great power to size ratio
- High free speed: 60000 rpm

#### BENEFITS

- Extremely easy to handle
- Quiet and lightweight
- ideal for tight access applications

17.000 RPM

# **CP9107**

# **CONTROL & POWER**

## **FEATURES**

# - Pistol die grinder

- Adjustable speed regulator
- Good power to size ratio
- 2-fingered progressive throttle
- Rubber grip on handle
- Through handle exhaust - Includes 1/4" and 6 mm collet

# **BENEFITS**

- Operator comfort and control
- Match speed to the job
- Ideal for difficult access areas

**CP3349 SALAVADE** 6,500 RPM

- 7" (180 mm) cup wheel capacity
- 4 hp (3000 W) high performance governed motor
- 6500 rpm free speed
- Robust housing
- Built-in lubricant tank
- Double action safety lever

#### **BENEFITS**

- Highest durability in demanding applications
- Superior torque for maximal productivity

# **CP3349 SALAVELE**

NOT FOR NORTH AMERICA AND ANSI MARKET

#### HIGHEST

**PERFORMANCE IN HEAVY** 

#### **FEATURES**

- 9" (230 mm) wheel capacity

APPLICATIONS

- 4 hp (3000 W) high performance governed motor
- 6500 rpm free speed
- Robust housing
- Built-in lubricant tank
- Double action safety lever

#### **BENEFITS**

- Highest durability in demanding applications
- Superior torque for maximal productivity

#### See details on page 44

#### **FEATURES** - Mini pistol disc sander with 3"

**ROTARY SANDING** 

- (75 mm) Roloc/twist-lock pads
- Rubber molded pistol grip
- Adjustable power regulator
- 2-fingered progressive throttle
- Quiet handle exhaust
- Includes: (1) 3" (75 mm) backing pad - (10) 3" (75 mm) 80, 100 and 120 grit
- sanding discs
- (1) 3" (75 mm) fine, medium and coarse surface prep discs and spindle wrench packed in a heavy-duty carrying case

#### **BENEFITS**

- Compact & lightweight
- Maximize operator control and ergonomics,
- less fatigue
- Job done faster and easier
- Excellent for small area sanding

# CP3070-120G

#### **H**IGH POWER & DURABLE

#### **FEATURES**

- Heavy-duty 5" (125 mm) sander
- High power 0.5hp (370 W)
- Low noise and vibrations

#### BENEFITS

- High durability
- Ergonomics Compact & easy handling
- Ideal for vertical sanding
- or tight area work

# Drilling

#### **Pistol grip drills**

- Ideal for all drilling tasks
- Maintenance up to very intensive duties
- Drilling hole capacity up to 1/2" (13mm) diameter in steel
- Extra-support side handle recommended for better handling with larger drilling capacity and higher torque

#### **Angle drills**

Ideal for restricted access application
Drilling hole capacity to 3/8" (10mm) dia. (in steel)

#### **Straight drills**

 Mainly smaller diameter drilling less than 3/8" (10mm) diametre (in steel)
 Prefered for vertical drilling

CP785

See details on page 50

**CP7300R** 

- 1/4" (6 mm) compact drill - Ergonomic grip and lightweight, only 1.35 lbs (0.61 kg)
- Progressive throttle
- Non reversible drill fast at 2800 rpm Planetary gearing with brass bushings for low wear and long life
- Adjustable exhaust
- Industrial quality Jacobs chuck

#### BENEFITS

- Fast, efficient and great for tight areas with its size
- Excellent precision to allow for very slow start-
- up and control throughout the drilling process Excellent for drilling, honing, reaming,
- and hole sawing

2,400 RPM

2,700 RPM

**CP9285** 

#### **CP9287** Same features as CP9285

with keyless chuck **CP9790** Same features as CP9285 with reversible

function and 2,000 RPM **CP9792** Same features as CP9790 with keyless chuck

CP9790 Kits See details on page 50

#### CP789R-26

2,900 RPM

#### **CP785QC**

#### Same features as CP785

with kevless chuck

DURABILITY

**FEATURES** 

& SMOOTH OPERATION

- 3/8" (10 mm) pistol drill

- Triple idler planetary gearing

- Unmatched durability

- Ergonomic handle

- Handle exhaust

- Ideal tool for all types of maintenance, general auto, truck work and body shops

- Powerful energy efficient motor resists stalls

#### See accessories on page 50

#### **CP789R-42**

- Maximize operator comfort Similar features as CP789R-26 with 4200 RPM
  - Productivity coupled with extreme durability

All models: Hose int. 3/8" (9.5mm) - @90 PSI (@6.3 Bar)

**Power & productivity FEATURES** 

- 3/8" (10 mm) pistol drill
- Powerful with 0.5 hp (370 W) motor
- Fast and efficient at 2900 rpm
- Industrial quality Jacobs chuck
- Ergonomic grip
- Handle exhaust

#### **BENEFITS**

- Productivity and durability
- Maximize operator comfort
- Power suitable for many applications

SUPER-DUTY & EFFICIENCY

- 3/8" (10 mm) reversible pistol drill

- Powerful with 0.5 hp (375 W) motor

- Teasing throttle and high-speed

- Industrial quality Jacobs chuck

#### 1/4" - 3/8" - 1/2" Drills

**CP785H** 

#### **CP9288**

Same features as CP9286 with keyless chuck

#### **CP9789**

Same features as CP9286 with reversible function and 800 RPM

#### **CP9791**

Same features as CP9789 with keyless chuck

#### HIGH TORQUE AND PRODUCTIVITY

#### FEATURES

- 1/2" (13 mm) pistol drill
- Powerful with 0.5 hp (370 W) motor
- Industrial quality Jacobs chuck
- High torque: 14.7 ft.lbs (20 Nm)
- Ergonomic grip and side handle
- Handle exhaust

#### BENEFITS

- Accommodates larger drill bits
- Powerful and resists to stalls
- Ideal tool for large hole drilling

#### SMOOTH OPERATION

#### FEATURES

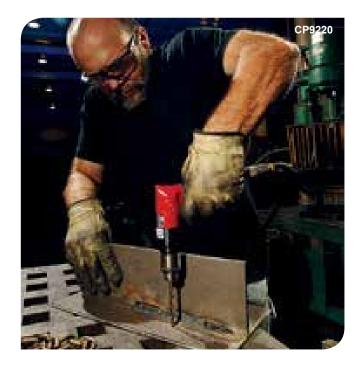

- 1/2" (13 mm) pistol drill
- Powerful energy efficient motor resist stalls
- Triple idler planetary gearing
- Side handle for comfort and control

#### BENEFITS

- Smooth operation and extended tool life
- Operator comfort and safety
- Suitable tool for various applications of large drilling

#### SUPER-DUTY & TORQUE

#### FEATURES

- 1/2" (13 mm) reversible pistol drill
- Powerful with 0.5 hp (370 W) motor
  Teasing throttle and low speed for precision
- drilling at 500 rpm
- Industrial quality Jacobs chuck
- Needle bearing gearing and oil free operation
- Ergonomic grip
- Side handle

#### BENEFITS

- Maximize operator comfort

Listed specifications are for reference only. Please check documents in each tool.

- Productivity coupled with extreme durability
- Perfect tool for heavy drilling, reaming,
- hole sawing and jobs requiring high torque

# Drilling

#### ANGLE DRILL FOR EASY ACCESS

#### **FEATURES**

- 3/8" (10 mm) angle drill
- Compact low profile head to get into confined spaces
- Reverse valve for easy directional change
- High performance gearing for extended durability

#### BENEFITS

- Compact angle head drill
- Operator control from start up through rundown
   Ideal for drilling and screw driving in confined areas
- CP1014P45

#### FEATURES

- 1/4" (6mm) industrial pistol drill
- with Jacobs keyed chuck
- Excellent power to weight ratio
- with 0.5hp (375W) motor
- Teasing throttle for progressive and safety control
- Exclusive handle with double wings for precise drilling - Durable gearbox reducing maintenance
- cost and downtime

#### CP1114P24 BENEFITS

- Operator comfort thanks to exclusive
- ergonomic features
- Compact shape & light weight for easy handling and access
- Designed for intensive duty and high durability

#### **Powerful in-line**

#### FEATURES

- 3/8" (10 mm) in-line drill
- High performance Jacobs chuck
- Built-in regulator for efficient control

#### BENEFITS

- Powerful and fast
- Durability and productivity
- Perfect tool for vertical drilling and to reach confined areas

500 rpm

2,500 RPM

#### COMPACT AND PRODUCTIVE

#### FEATURES

- 3/8" (10mm) industrial pistol drill with Jacobs keyed chuck
- Excellent power to weight ratio with 0.5hp (375W) motor
- Teasing throttle for progressive and safety control
- Exclusive handle with double wings for precise drilling
- Durable gearbox reducing maintenance cost and downtime

# Chipping

#### **Needle scalers**

Perfect for derusting applications, pistol or in-line needle scalers are used in almost all the industry

#### **Chipping hammers**

Pistol or in-line chipping hammers including selection of unique vibration damping body to improve operator comfort and minimize fatigue.

#### In-line needle scaler / Chipping hammer

Quick change 2 in 1 needle scaler and chipping hammer for less down time

#### How to define the right percussive?

#### Step 1

#### Applications

- Derusting
- Deburring
- After welding
- ► Duty
- ► Access

#### Step 2

#### Consumables

- Needles size and number
- Chisel type and dimensions

#### Step 3

#### **Tools**

- ► Handle type
- Vibration level
- Stroke capacity
- Bore

# Chipping

# **CP7111**

**CP7111 Hex** Same features as CP7111 with hexagonal shank

#### **PISTOL GRIP HAMMER**

#### **FEATURES**

- Standard .401 round shank - Easy change retainer for quick
- accessory change

#### BENEFITS

- Powerful and cost effective
- Fast cutting action
- Designed for all general works

.401'

**CP7110** 

**CP7110 Kit** See details on page 54

# 401" (10.2 mm)

#### **HEAVY-DUTY HAMMER**

#### **FEATURES**

- Heavy-duty pistol grip hammer
- Standard .401 round shank
- Internal muffler minimizes exhaust sound
- Unique vibration damping
- Teasing trigger for slow start-up

#### BENEFITS

- Maximize operator comfort and control
- Smooth operation - Low vibrations to maximize productivity

CP7111 Hex Kit See details on page 54

**CP7150** 

**CP7150 Kit** 

See details on page 54

.401" (10.2 mm)

CP714 Kit See details on page 54

#### **PRECISION & PRODUCTIVITY** FEATURES

- Super-duty pistol grip hammer
- Positive action trigger for precise control
- Speed regulator

#### BENEFITS

- Versatile, handling a wide range of body shop applications including front end,
- exhaust, frame and body work
- Operator comfort

#### See accessories on page 54

#### **FEATURES** - Standard .401 round shank

**HEAVY-DUTY PISTOL** 

- Longer piston stroke for more power
- Integral muffler minimizes exhaust sound

#### BENEFITS

HAMMER

- Excellent power / weight ratio
- Fast action and withstands rugged use
- Ideal tool for heavy-duty application

Listed specifications are for reference only. Please check documents in each tool.

#### **Percussive Tools**

# **CP717**

CP717 Kit

#### MOST POWERFUL

#### FEATURES

- Super-duty pistol grip hammer
- Standard .498 round shank
- Most powerful CP air hammer
- Positive action trigger

#### See details on page 54 BENEFITS

- Power and precision
- Flexible operating positions
- Ideal tool for deep cutting, bolt riveting and super-duty applications

#### **B20-00**

Flexible and low air consumption

#### B20-0

Handy handle length 43" (1,100mm) covers all basic application

#### B20-1

-

Longest reach handle 68" (1,730mm) enable the widest scaling work

#### **B20L**

Aluminum body to reduce weight

#### B20L-1

Lightweight suitable for vertical work

DURABLE

**FEATURES** 

AND VERSATILE

- General purpose needle scaler

- Rubber sleeve on handle for better comfort

**CP7125** 

#### 2 TOOLS IN 1

#### FEATURES

1/2"

(12.7 mm)

- General purpose needle scaler
- Weld flux chipping hammer
- Quick change chisel retainer
- Adjustable sleeve, 1/8" (19 x 3mm) steel needles and 1.37" (35 mm) width chisel

#### BENEFITS

- Easily converts into a chipping hammer
- Durable and economical solution
- Ideal for surface preparation

# HAMMERS KITS

CP7111 Kit Part No. 8941171110

Kit includes:

- (1) CP7111 Hammer

- 1 Nipple
- 1 Quick change retainer spring
- 5 Round shank chisels - 1 oiler

## CP7111HEX Kit

Part No. 8941171111 Kit includes:

- (1) CP711HEX Hammer
- 1 Nipple
- 1 Quick change retainer spring
- 5 Hexagonal shank chisels
- 1 oiler

CP717 Kit Part No. T025365

Kit includes:

- (4) Chisels

- (1) CP717 Hammer

## CP7150 Kit

Part No. 8941171500 Kit includes: - (1) CP7150 Hammer - 1 Nipple - 1 Quick change

- retainer spring - 5 Round shank chisels
- 5 Round shank cr

#### CP7110 Kit

Part No. 8941171101

- Kit includes: - (1) CP7110 Hammer
- 1 Nipple
- 1 Posi-lock retainer
- 1 Quick change retainer spring
- 4 Round shank chisels

See details on page 60

ERGONOMIC

- Air reciprocating saw

LOW VIBRATION AND

- Low vibrations
- 10 mm stroke length
- Great power and speed of 10000 strokes per minute
  360° swivel air inlet
- 500 300001 an 1

#### BENEFITS

- Ergonomic design and comfort
- and easy handling
- Maximize operator comfort
- and productivity
- Premium tool for all cutting applications

**CP881** 

#### **R**UGGED SAW

#### **FEATURES**

- Air reciprocating saw
- Adjustable guard guide
- 10 mm stroke length
- Includes:
- one each 18T, 28T, 32T replacement blades

#### BENEFITS

- Compact and lightweight
- Ideal tool for periodic usage for all general cutting

3/8"/10mm stroke

9,500 RPM

HO ----

#### **R**UGGED SAW

#### FEATURES

- Heavy-duty reciprocating saw
- Power and speed of 9500 strokes per minute
- Heavy-duty construction
- Adjustable guard guide
- Comfortable rubber grip
- Includes 32T saw blade (1)

#### BENEFITS

- Cut through material with ease
- Powerful and durability
- Ideal tool for intensive use

All models: Hose int. 3/8" (9.5mm) - @90 PSI (@6.3 Bar)

#### **CP874**

#### **H**IGH-SPEED CUTTING

#### **FEATURES**

- High speed cutter
- Wheel diameter 2 7/8" (73 mm)
- Adjustable speed regulator
- Safety lever to prevent accidental start-up
- Rear exhaust

#### BENEFITS

- Precise and ideal control
- Ideal for cutting through composite, sheet
- metal, bolts, etc.

#### **G**OOD CUTTING CONTROL

#### FEATURES

- Heavy-duty nibbler

#### - Nibbling capacity:

- steel up to .60" (16 gauge)
- aluminum up to .102" (10 gauge)
- Easy access to punch and die for quick replacement
- Lever throttle for low-speed starting
- 4 optional cutting positions

#### BENEFITS

- Easy to operate and control
- The best for tight
- corners and circles
- Used for nibbling plastic, tin, aluminum, steel and others metals

#### **DURABILITY & POWER**

#### FEATURES

- Heavy-duty high speed cutter
- Rugged, energy efficient 0.5hp (370 W) motor
- Lightweight tool: 1.63 lbs (0.74kg)
- Square handle design for positive grip
- Safety lever to prevent accidental start-up

#### BENEFITS

- Power, durability and productivity
- Excellent for cutting through composite,
- fiberglass, steel metal, bolts, clamps and hangars

#### **R**ELIABLE & POWERFUL

#### **FEATURES**

- Heavy-duty pistol shear
- Powerful efficient 0.5 hp (375 W) motor to cut
- up to 18-gauge steel (1.1 mm 0.04")
- Ergonomic handle design

#### BENEFITS

- Smooth operation and extended life
- Operator comfort
- Excellent tool for cutting square and
- angles in all types of aluminum, tin and steel

#### See accessories on page 60

See details on page 60

#### AIR SCRIBE

100-

#### FEATURES

- Air scribe with the highest durability in the market
- Hose 8ft (2.4m) length with air filter
- Convertible to a light scaler

#### BENEFITS

- Ideal for use on variety of materials such as metals, plastics, ceramics, and glass
- Easy handling
- Adjustable power for a variety
- of applications

#### **Powerful & precise**

#### FEATURES

- Air file 0.4" (10 mm) stroke
- Lock-off throttle to prevent accidental start-up
- 360° swivel air inlet
- Rubber handle grip
- Includes 4 types of file: flat, half round, round, triangular

#### BENEFITS

- Excellent tool for use in confined areas or for precise work
- Deburring or sharpening sheet metal,
- iron or plastic

# CP9705

#### **Powerful & precise**

#### FEATURES

- Air file 0.2" (5mm) stroke
- Lock-off throttle to prevent accidental start-up
- 360° swivel air inlet
- Rubber handle grip
- Includes 4 types of file: flat, half round, round, triangular

#### BENEFITS

- Excellent tool for use in confined areas or for precise work
- Deburring or sharpening sheet metal, iron or plastic

#### Air filters - Air scribes & Engravers - Riveter - Caulking gun

**CP9882** 

# **CP710**

#### **FEATURES**

- Standard engraving pen
- Compact and lightweight
- Fine point stylus
- Cushion finger grip for comfort
- Low air consumption

#### BENEFITS

- Easy handling
- Operator comfort
- Enhanced control

#### **CP9884**

1/4" composite riveter with pulling force of 3530 lbs. Includes 3/16" & 1/4" nose pieces

with pulling force 1900 lbs. Includes 1/8", 5/32" & 3/16" nose pieces

- Accepts standard cartridges: 2" x 8-1/2" (50x210 mm)

#### BENEFITS

- Labor time saving
- Easy to handle
- Operator comfort

# **Air Line Accessories**

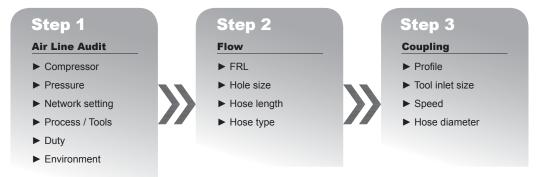

Chicago Pneumatic Air Preparation Units are designed to help you get maximum performance from your tools.

They ensure minimal pressure drop and thus minimum energy losses in the air distribution system, benefiting the environment and cutting your operating costs.

The lifetimes of your tools will be extended by using air preparation units and with that comes lower repair costs and less downtime. A correct air installation guarantees productivity and good total economy.

#### How to select your Air Line Accessories?

# **Air Line Accessories**

## FILTERS, REGULATORS, LUBRICATORS

#### Why should you use a filter, regulator and lubricator ?

The use of a filter, regulator and lubricator (in that order) for pretool air preparation is strongly recommended by Chicago Pneumatic. Proper air preparation will result in improved tool performance and increased tool life. The units should be mounted as close to the tool as possible, preferably right where the tool hose is connected to the system. To realize their full value, these units should be checked on a regular assigned basis by maintenance workers or the operators themselves.

#### **AIR FILTER**

Filter separates impurities such as water and solid particles.

Not using filters in combination with air tools leads to shorter service life, higher maintenance costs and lower efficiency. Old air systems with cool dryers, for instance, generate a lot of rust and running tools without installing a filter could damage the tool in less than a week.

Chicago Pneumatic filters separate up to 98% of the water when operating within their working range. All the types (Small, Medium and Big) are very low pressure drop.

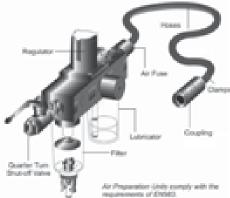

#### REGULATOR

The regulator ensures that the pre-set working pressure remains constant - regardless of pressure variations in the intake air and minor variations in the airflow rate. For example, a pressure of 1 bar higher than necessary results in a 16% increase in air consumption.

Spring controlled regulators are quick acting and therefore should be used for all types of air tools.

#### LUBRICATORS

If lubricators are not used, tool motor vanes will need to be changed more often. The life of the vanes may decrease to as little as 1/10th of the normal working time. The oil fog lubricator is the most common type of lubricator. It supplies a mist of oil to the air hose.

High air flow capacity: up to 220 cfm (100 l/s) to cover most of the pneumatic tool needs. Available in kits: 1/2", 3/4", BSP or NPT, 2 or 3 stages units or individual units. Durable design including quick release bayonet metal bowls for rough working environments.

	3 STAGE	3/4 G	220	100	246/17	6.8	201	894 016 8520	894 016 8484

Included with the units: Filter 5µm, Pressure gauge 0-150 psi - 0-10 bar, Microfog lubricator, Automatic drain valve - At max air flow  $\Delta$  14.5 PSI (1 bar)

#### THE FLEXIBILITY OF AIR-FLEX

The Air-Flex makes all rigid hoses flexible and multi-directional. Easy: less effort due to hose rigidity, makes work easier in hard to reach areas. Comfort and safety: no twisting, the hose remains in the ideal working position and lower the risk of tendinitis. Less wear: no more premature hose wear.

MULTI DIRECTION	MAX RECOMM	IENDED FLOW	WE	IGHT	LEN	IGTH	PART NUMBER

1/2"	74	35	0.29	0.132	3.23	82	615 804 7500	615 804 7510	615 995 5580		

#### HOSES

Selecting a hose first depends on the working environment. The environments are evaluated according to the Working temperature, level of usage, presence of oil ... With such inputs you can select the correct material of hose for the application. The most common hose materials are: Rubber, PVC and Polyurethane. Air Flow is a important point to be checked. The diameter of the hose shouldn't be smaller than the recommended flow for your tool, otherwise the pressure drop can be higher than expected.

Hoses have a standard pressure drop per length. To avoid performance problems in the tool, if the hose is too long, you must increase the diameter of it.

#### **EFFI MAX HOSES**

Effi max is the unique range of CP Brand rubber hose. Its construction allows a thinner wall for the same working pressure. The result is a light weight and more flexible hose

DIMENSIONS AIR FLOW WEIGHT LENGTH PART PER 65.6 ft /20m (IDxOD) Aimed to generic grinding applications NUMBER in. #### **CUSTOMERS BENEFITS**

- · No hoses on the ground for improved safety
- From 3.3 to 33 ft / 49 or 52 ft (1 to 10 / 15 or 16 m)
- hose lengths with feedback force for a clean work space
- · Directional swivel-plate to help you correctly reach your application
- · High airflow for maximum productivity
- · Lightweight and flexible polyurethane hose to reduce operator fatigue
- · Open Reels with rubber hose available for heavy-duty grinding/spark areas
- Working temperatures: -30°C+ 60°C (-4°F +140°F)

Chicago Pneumatic Tools follows a policy of continuous product improvement. Specifications and descriptions are thus subject to change without notice. Check the online ecatalog at www.cp.com for the latest product information.

# General Safety Instructions for the Operation of Power Tools

The goal of Chicago Pneumatic is to produce tools that help the operator work safely and efficiently. The most important safety device for this or any tool is the operator. Care and good judgement are the best protection against injury. All possible hazards cannot be covered here, but we have tried to highlight some of the important ones. Individuals should look for and obey Caution, Warning and Danger Signs placed on tools, and displayed in the workplace. Operators should read and follow safety instructions packed with each tool. For a copy of these instructions, contact your nearest Chicago Pneumatic representative or www.cp.com.

Learn how each tool works. Even if you have previously used similar tools, carefully check out each tool before you use it. Get the "feel" of it and know capabilities, limitations, potential hazards, how it operates and how it stops.

#### WARNING

Multiple Hazards. Read and understand safety instructions supplied with tool before operating or servicing. Failure to do so can result in serious bodily injury.

All tools are designed to operate on a air line pressure of 6.3 bar +/- 0.15 bar in accordance with ISO2787, 8NTC1.2. Sound levels +/- 3dB(A)\* are measured in accordance with EN ISO15744. Vibration values\* are measured in accordance with ISO8662 & ISO28927

\*These declared values were obtained by laboratory type testing in accordance with the stated standards and are suitable for comparison with the declared values of other tools tested in accordance with the same standards. These declared values are not adequate for use in risk assessments and values measured in individual work places may be higher. The actual exposure values and risk of harm experienced by an individual user are unique and depend upon the way the user works, the workpiece and the workstation design, as well upon the exposure time and the physical condition of the user.

We, Chicago Pneumatic, cannot be held liable for the consequences of using the declared values, instead of values reflecting the actual exposure, in an individual risk assessment in a work place situation over which we have no control.

#### **Compressed Air Hazards**

- Air under pressure can cause injury. Never point an air hose at yourself or anyone else. Never blow your clothes free of dust with compressed air. Always direct exhaust air away from yourself and others in the work area.
- Always check for damaged or loose hoses and fittings before using an air tool, and replace if necessary. Whipping hoses can cause serious injury.
- . Disconnect the tool from the air supply when not in use, before changing accessories, setting the torque, or when making repairs.
- Do not exceed rated air pressure to increase the output of the tool. This could cause injury and shorten tool life.
- Do not assemble quick coupler on the tool. Vibration can cause breakage resulting in a whipping air hose. Instead, use quick couplers on the end of a short leader hose.
- . When universal twist couplings are used, lock pins must be installed to prevent accidental hose disconnection.
- Air tools are not intended for use in explosive atmospheres and are not insulated for contact with electric power sources.

#### Projectile Hazards for all air tools

• Always wear impact resistant eye and face protection when involved with or near the operation or the repair of air tools.

#### Noise Hazards

- Hearing loss can result from prolonged exposure to excessive sound levels.
- Use hearing protection as recommended by your employer or OSHA regulation (see 29 CFR part 1910).

#### Entanglement Hazards

 To reduce the risk of injury from entanglement, do not wear loose clothing when using rotating accessories.

 Proper breathing protection must be worn when working with materials which produce airborne particles.

#### Vibration Hazards

- Repetitive work motions, awkward positions and exposure to vibration may be harmful to your hands and arms.
- If numbness, tingling, pain or whitening of the skin occurs, stop using tool and consult a physician.

#### Additional Hazards

- Slip/Trip/Fall is a major cause of serious injury or death. Beware of excess hose/cord left on the walking or work surface.
- Operators and maintenance personnel must be physically fit to perform job tasks, and handle the bulk, weight and power of the tool.
- Deburring tools should be used to reduce risk of cuts and abrasions due to burrs.
- Wear gloves to protect hands from sharp edges.

# Specific Safety Instructions for Power Tool Groups

In addition to the General Safety Instructions, the following are safety instructions and warnings that apply to the safe operation of specific power tool groups. Consult ANSI B186.1 Safety Code for Portable Air Tools. Available from: America National Standards Institute (ANSI), 11 W. 42nd St., 13th floor, New York, New York 10036, (212) 642-4900; or the European Committee for Standardization, Rue de Stassart 36, 1050 Brussels, Belgium.

#### 🕂 Impact Wrenches

- Never use hand sockets. Use only impact sockets in good condition. Sockets in poor condition reduce impact power and could also shatter, resulting in personal injury.
- When using a universal joint, never free run the tool, it may run too fast and cause the joint to be thrown from the tool.
  Always use the simplest hook-up possible. Long springy extension bars and adapters absorb impact power and could break
- loose resulting in personal injury. Instead, use deep sockets whenever possible.
  For tools using the pin and o-ring socket retainer, use the o-ring to securely retain the socket pin.

#### Abrasive Tools

- Never mount a grinding wheel on a sander.
- Never use a grinding wheel marked with a speed lower than the rated air grinder speed.
- All grinding wheels and polishing/sanding accessories should be checked for cracks or other damage before mounting and use.
  Always use the recommended wheel guard to prevent injury when performing grinding operations. If a guard has withstood wheel or disc breakage, it must be replaced.
- Position a guard between the grinding wheel or disc and the operator. Use barriers to protect others from fragments and grinding sparks.
- Make sure grinding wheels are mounted according to manufacturer's specifications; always use correct mounting flanges.
- Before grinding, test grinding wheel or disc by briefly running tool at full throttle. Be sure to use a barrier (such as under a heavy work table) to protect yourself from possible broken wheel parts.
- Never tamper with or remove a speed governor from a tool to make it run faster. Periodically check tool speed with a tachometer.

#### Assembly Tools

- Serious injury can result from over-torqued or under-torqued fasteners, which can break, or loosen and separate.
- Released assemblies can become projectiles. Assemblies requiring a specific torque must be checked using a torque meter.

#### <u> I</u>Drills

• Keep away from rotating bit and chuck. You can become cut or burned if you come in contact with the drill bit, chips or work surface.

- Use intermittent drill pressure to avoid long shaved chips.
- The drill bit can suddenly bind and cause the work piece or tool to rotate causing arm and shoulder injuries.
- ANSI recommends use of a support handle on drills with a chuck larger than 3/8" (10 mm).

 All chisels, rivet sets and other accessories should be checked for cracks, excessive wear, or other physical damage before each use. Accessories that show signs of damage should be replaced immediately.

• Never use a tool without the proper accessory retainer.

#### 🛕 Accessories

Hammers

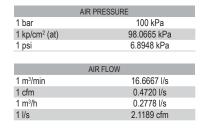

- Always use accessories of correct size and design for the tool. Tool and accessories must not be modified in any way.
- Never use a tool without the proper accessory retainer.

See Safety Requirements for Abraiding Materials with Coated Abrasives (B7.7) from ANSI.

#### Over 110 years of experience

Since 1901 the Chicago Pneumatic (CP) name has represented reliability and attention to customer needs, with construction, maintenance and production tools and compressors designed for specific industrial applications. Today, CP has a global reach, with local distributors around the world.

Our people start every single day with a passion to research, develop, manufacture and deliver new products that are meant to meet your needs not only today, but tomorrow as well. To learn more, visit www.cp.com.
